

Glyph Placement Diagnostic

Strategy 1: anchor “west” (current approach)

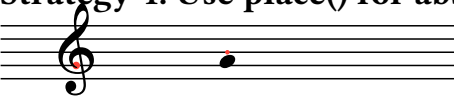

Strategy 2: anchor “mid” (used for noteheads currently)

Strategy 3: zero-height box with baseline control

Strategy 4: Use place() for absolute positioning

Strategy 5: Default anchor (no anchor specified)

Strategy 6: Using move() to shift from baseline

Strategy 7: Using top-edge alignment

Glyph sizes: Visual check

(treble clef at 19.84pt)

Staff space = 1.75mm, font size = 19.84pt

Individual glyph rendering at correct size

Notehead (should be 1 staff-space = 1.75mm tall):
